

Sundae Labs

Sundae Governance

A LAYER 2 GOVERNANCE SOLUTION FOR PROJECTS
BUILDING ON CARDANO.

Empowering Decentralized Governance

Experience next-gen decentralized governance with Sundae Labs Governance. We offer a robust platform for seamless proposal creations, voting accessibility, and user verifiability, designed to put control back into the hands of the community.

Unmatched Security & Control: Sundae Labs' platform provides unmatched cryptographic security, protecting your proposals and voting data from tampering. Additionally, our comprehensive controls ensure that proposal creation and voting access are limited to authorized individuals, putting the power back in your hands.

Transparency & Verification: We offer a unique user verifiability feature that allows every community member to verify their vote independently. Plus, our independent auditing service employs a network of respected community members who publicly attest to the accuracy of each election, reinforcing trust in our platform's integrity.

Innovative Integrations & NFT Minting: Our platform's integration with diverse ecosystems like Cexplorer enhances your governance experience. Additionally, we introduce a novel concept in governance with the minting of voting results on-chain

as an NFT, providing a transparent record and a potential tool for boot-strapping smart contracts.

Unique Customization & Hosting: Make your mark with our custom branding feature, including a dedicated landing page for each project. With our robust IPFS/Arweave hosting, your proposals and votes are mirrored to a durable storage medium, ensuring they're always accessible and well-protected.

Interactive Voting: Our platform enriches your voting experience with the option to attach commentary, providing context to your votes and promoting a more informed and engaged community. Plus, our timing customization feature lets you control vote start, end, and snapshot dates, aligning with your unique governance processes.

Hosted plans start at just \$650/mo. Reach out to contact@sundaeswap.finance to learn how to get started!
